FOR IMMEDIATE RELEASE

B9Creations Partners with Legor Group, Global Jewelry Tech Provider, to Deliver 3D Printing Solutions Across Europe, Africa, Asia

RAPID CITY, S.D. (Feb. X, 2018) – [B9Creations](#) announced today it has signed a distribution agreement with [Legor Group](#), a global jewelry technology provider, to deliver its professional 3D printing solutions across Europe, Turkey, Morocco and Russia.

Founded in 1979 in Italy, Legor Group brings nearly 40 years of experience in metallurgy, master alloys, plating, machinery and tools paired with a deep knowledge of the jewelry market. In addition to its European headquarters, Legor has branches in the United States, Turkey, Russia, Thailand, Hong Kong and China.

B9Creations and Legor are both committed to providing exceptional customer service and enabling end-users to better serve their customers through 3D printing technology.

The agreement forms part of the B9Creation's strategy to focus on innovation and investment in its partner ecosystem. As Legor's exclusive provider of 3D printing solutions, B9Creations builds on Legor's renowned reputation and robust customer portfolio to propel its regional growth initiatives, as Legor adds leading-edge technologies to further enable its customers' success.

"We're excited to partner with Legor to bring B9Creations additive manufacturing technology to a new customer base who can leverage our 3D printing solutions and Legor's industry expertise to grow their business," said Shon Anderson, B9Creations CEO. "Legor has in-depth knowledge of the global jewelry landscape and a proven track record of providing a world-class customer experience to support the delivery of our 3D printing solutions."

Christian Celegato, Legor Group Product Manager, adds, "We were looking to further support our clients in the jewelry and fashion market by providing them with a top 3D printer. We found in B9Creations the best partner to reach this goal. Their R&D specialization will help our clients easily fulfill their most innovative projects. The simplicity, speed and quality with which B9 Core Series allows the expert customer and even the less expert one to print their projects is incredible – and with a cost per printed model among the lowest in the market. In a rapidly evolving world such as 3D printing, a product like this was missing. Seeing customers' wonder and satisfaction when they start to use it really gratifies us."

Legor will be showcasing B9Creations' product line at the [Inhorgenta Munich trade show](#), Feb. 16-19, in Munich, Germany. Pav. A2, Booth 448. The company will also be at the [Hellenic Jewellery Show](#), Feb. 23-26, in Athens, Greece.
