

Developed by our R&D lab, this new e-coating ensures high performance at a competitive price.

Does not contain nano-ceramic particles

LASTING SHININESS:
keeps its brightness and transparency without yellowing over time

GOOD DISTRIBUTION ON THE ITEM:
application of the product on surfaces is much better than other products on the market

EASY TO APPLY:
easy to apply on difficult surfaces, such as large and flat surfaces

EXTREMELY VERSATILE:
it adapts very well to the application of pigments or other additives, as: **MATTE ADDITIVE** or paste for covering effect like **NIVAL**

DEFECT-FREE:
product not subject to the typical defects of cathophoretic paints, such as bubbles, pitting, orange peel effect or iridescence

TEST:

The quality of this resin is proven by the abrasion resistance and regulated climatic quality tests conducted in the laboratory on samples treated with the cathophoretic paint obtained with this product.

TEST	REGULATION	DURATION (h)	OUTCOME	Notes
TURBULA + CROSS-HATCH	ISO 23160 + ISO 2409	0,5	PASS	No significant alterations
SYNTHETIC SWEAT	NF S80 - 772	24	PASS	No bubbles or discolorations of the paint layer are observed
DAMP HEAT	ISO 4611	96	PASS	No alteration of the samples
